

## Resource as a Service

Concept's Resource as a Service (RaaS) is a trusted B2B enablement framework model. Based on many years of experience, supporting all stages of the digital delivery lifecycle. Our trusted associate pool delivers efficient, speedy solutions across all areas of Digital Transformation and BAU tech support.

Whether you are looking for a Product Manager or a team of Infrastructure Engineers, we can quickly understand your requirements, augment the right resource model, deploy and deliver.

We understand your reputation depends upon our ability to react with agility whilst maintaining assurance and control for your peace of mind.

### Benefits of utilising RaaS:

- Dedicated service delivery manager
- Monthly PO burndown reports
- Vetted, pre-approved Concept associates
- Swift, trouble-free onboarding and offboarding
- Weekly/monthly service reports
